HAPIN Trial

As part of the randomized Control Trail of an LPG stove and Continuous fuel distribution intervention and promotion of its exclusive use among 3,200 households in four LMICs (India, Guatemala, Peru, and Rwanda). Following an 18-month period of planning, piloting and formative research, the study began recruiting participants in May 2018 and completed enrollment in February 2020; follow-up data collection was completed in August 2021.

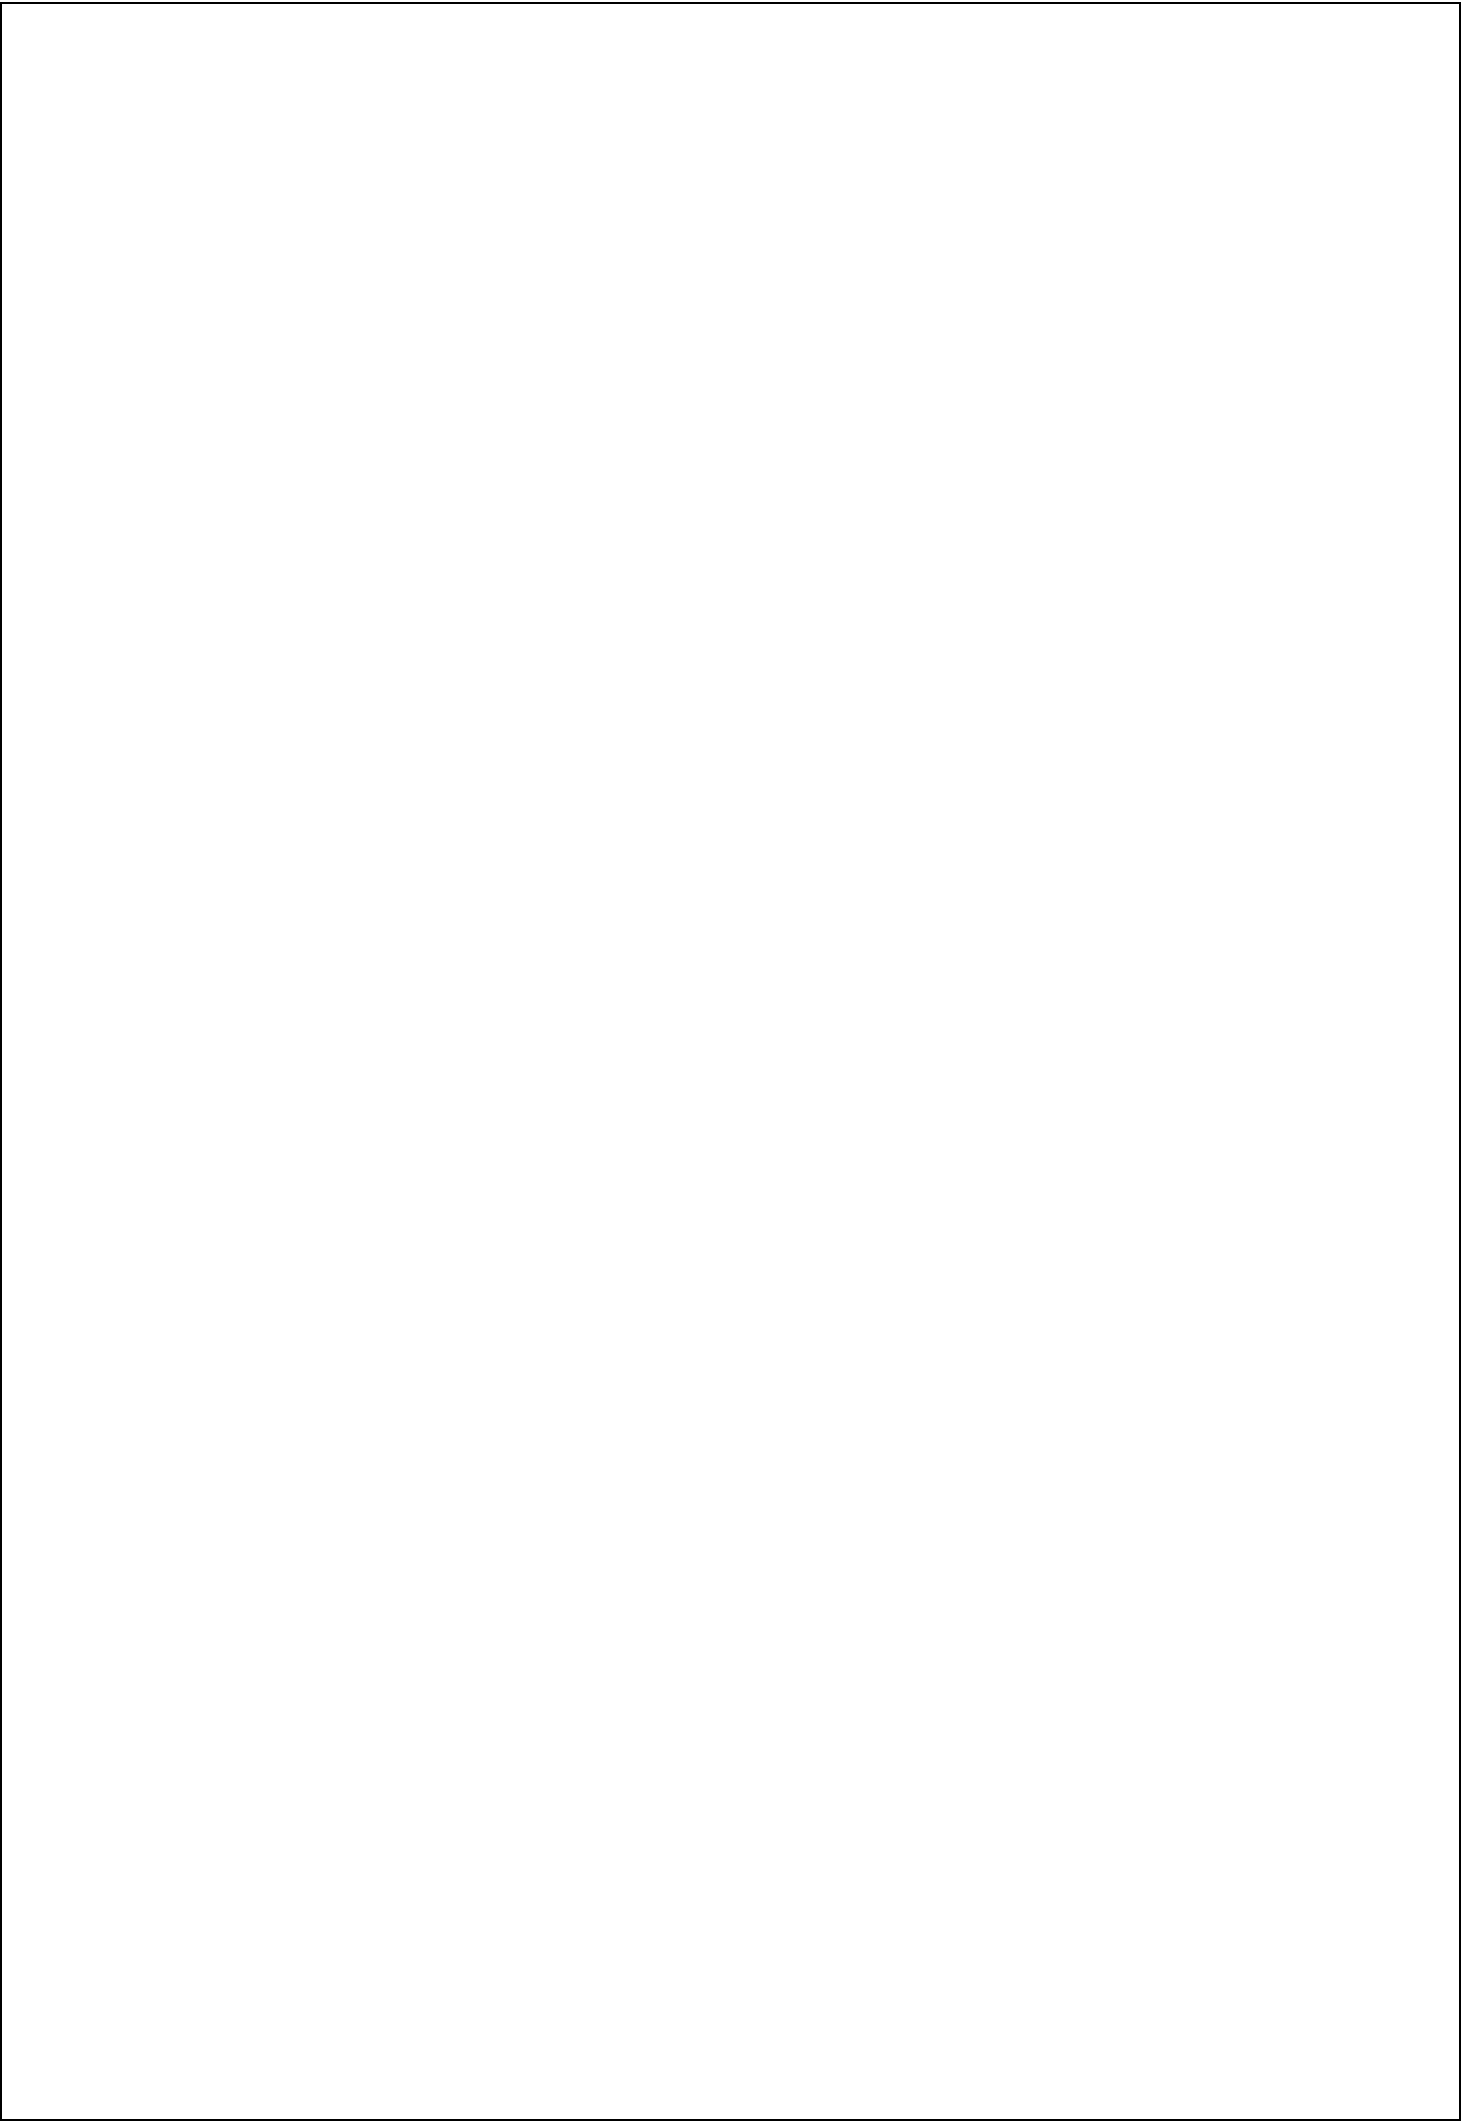

In each county, eligible pregnant women were recruited and their household randomly assigned to intervention and controls groups on a 1:1 ratio and they are followed for ~18 months until their newborn child is 1 year old.

The pregnant women were given training on LPG Stove usage and safety procedures while handling it. In addition the participants were encouraged to use these stoves for health and environmental benefits

Dear Dr Vidhya,

The Population Council and the International Forum for Environment, Sustainability and Technology (iFOREST) are pleased to invite you for dialogue series on '***Population and Climate Action***'. The first meeting of the series is scheduled to be held on **December 21, 2021 (Tuesday) at 10 am**, at the India Habitat Centre, New Delhi. The meeting is being organised in the backdrop of an urgent need for supporting climate action and the need to bridge the evidence gaps in understanding the intersection of population dynamics and climate crisis.

We aim to bring together diverse perspectives from different subject matter experts to inform future discourse and research/policy action. A background note in this regard is attached for your perusal.

Given your expertise in this issue, we would like to have your presence in this meeting. The meeting will likely be held in a hybrid mode. And we are looking forward to your positive response. Population Council will be happy to arrange the logistics to facilitate your attendance at the event.

A line of confirmation to Bidhubhusan Mahapatra (bbmahapatra@popcouncil.org) by 10th December, 2021 would be highly appreciated and would enable us to make necessary arrangements.

Best,
Niranjan
